

Sample Schedule (TR Class)

Below is a sample weekly schedule, together with time breakdown of how long I anticipate each scheduled element should take. It is expected that for every unit, you spend about 2 – 3 hours of work *outside of class/office hours*. For a 4 unit course, you can therefore expect to spend approximately 8 – 12 hours of work outside of class/office hours. You'll notice there are three letters (**C**, **H**, and **R**) associated to each item. These stand for **C**lass, **H**omework, and **R**eading, respectively. This schedule highlights a balance of all three components.

The estimate given here includes attending class and a large number of Professor Hansen's office hours and other Tutor Hours (items labelled **C**). This contributes about 6 hours to the total. So if you exclude those, this schedule actually has you doing about 9 hours of independent work (items labelled **H** or **R**), which is *on the lower end of the amount of work expected*. So, even if you don't adhere to this schedule exactly, plan your time accordingly!
